abbkarammar107@gmail.com

An Computer Science major with a record reflecting outstanding academic achievement while maintaining a high level of success in extracurricular activities. My work history includes working in Fin-Tech, software, hardware, sales, teaching, and electronics lab experience where leadership, supervision, critical thinking, and collaborative teamwork skills were utilized. Fluent in both English and Arabic.

WORK EXPERIENCE

Data Analyst

2019 to Present
Amazon
Duluth, GA

- Worked on the Payment Express Implementation team to improve internal work management by researching, developing, and integrating new tools and processes.

- Tested and provided feedback on lab projects using Spark, Scala, Linux.

- Analyzed users needs and came up with design software solutions.

- Provided support, enhancement and maintenance to new and existing projects.

Lab Technician Assistant

2019 to 2019
Georgia State University
Atlanta, GA

- Instructed underprivileged high school students and led tutorial sessions for groups of up to 20 students on engineering concepts, such as circuit analysis and computational logic circuits. Also used AutoCAD and SolidWorks for design projects

- Supervised workshops focusing on robotics, where students would build and program a Parallax Activity Bot. Also designed electrical circuits using a microcontroller.
